- 1. In every larger forced labor camp, there was a Cultural-Educational Division (Kulturno-vospitatelnaya chast KVCh). Two rooms in one barrack were set aside for books and magazines. Films were shown in the dining hall. There were few technically books and all were in Russian some Turgenev, Gogol, 25X1 Lermontov, and Bushkin. There were allso come works in translation, as Karl Marx and Anatole France. In each barrack, one copy of Fravda was available, but few prisoners read the paper. There was also a local paper, published daily, in Magadan, called the Sovetskava Kolvma. By had only about two pages and arrived irregularly. To attend the film shows, prisoners had to pay 2.50 rubles per ticket. These shows were given two or three times a month. The films were mostly Soviet, with a sprinkling of foreign films. The Soviet films were boring, usually about kolkhozy, war, or the operat Following are the titles of films shown in the camps:
 - a. Soviet films: "Meeting on the Elbe"; "Suvorov"; "Chapayev"; "The Stone Flower"; "Sadko and Maksimka". The last was about a little negro boy abandoned by the Americans and picked up by Soviet sailors; in one scene a single Soviet sailor knocked out 20 Americans.
 - b. French films: "Lowest Rank" (poslednogo ranga), about a boxer; "Address Unknown" (adres nei zvestno).

c. Italian films: "Places in Town" (mesta na gorode), about slums in Italy; "Paillazzo"; "Come Back to the Circus" (Vernis na arenu).

2

Radio Broadcasts and Amnesty of Prisoners in 1953

- 2. There was a loudspeaker in camp which gave mostly Radio Moscow or Khabarovsk. At the time of Stalin's death, there were numerous news bulletins on his health and then suddenly the radio was turned off. Shortly thereafter, when the prisoners were going to work they passed a garrison where the Soviet flag was draped in black and they rejoiced. Many rumors about impending changes were heard, but Stalin's death had no effect on the political prisoners. The ammesty was only for the criminal prisoners. During the Korean War, the prisoners heard only the Soviet radio, which gave mostly reports about the number of prisoners taken and airplanes shot down. The prisoners were very skeptical and believed little of what they heard.
- 3. The amnesty for criminals had little lasting effect. Many of them were freed, as was announced in the press and on the radio, but after a month or two some 80 percent were back in camp. One thief was returned to prison four times.

Camp Organizations: Criminal Groups

4. There were no organizations among political prisoners. They all disliked the government and hoped for war. They waited for the arrival of the Americans year after year. The only organization among political prisoners that source knew was a small group of about 15 people who got together to give a production of "Don Juan". They also had a small orchestra, made up mostly of strings, which gave an occasional concert. Criminal prisoners always had organizations but not against the government. All camps for criminals were divided into two main factions, the thieves (vori) and their enemies, the turncoats or suki. The suki were those who had agreed to do some work, mostly for the camp administration. The fights between the two groups were continuous and often lead to killings. Between these two groups were the independents (freyer: sic) who were afraid of both sides. The proportions were about 60 percent thieves, 30 percent traitors, and 10 percent independents. A special group, cutting across the others were the blatnoy who refused to work, posed, smoked, and struck the innocent.

	refused to work, posed smoked and struck the innocent.	
5.	blat was the same as prostitution (sic), which was	25 X 1
	extensive.	
	<u>Health and Sanitation</u>	
6.	Drinking water in the Third Factory Camp came from a well in summer. In winter, ice was cut in the Seymchan River and dumped into a tank which stood near the	
	stove in each barrack.	25 X 1
7.	The prisoners had little protection against the cold; they did have gloves. Frost- bite was common,at least 20 cases in which frozen hands, legs, or arms had to be amputated.	25 X 1
8.	For one or two months in summer, mostly June and July, mosquitoes were very numerous, particularly in the woods. For sleeping at night, prisoners had a canvas hood, with mosquito netting in front of the face.	
9•	Guards and officials seemed healthy. All prisoners suffered from a variety of diseases, most of them caused by malnutrition and lack of vitamins. Fruit, milk, and vegetables, except cabbage, were never given to prisoners. One prevalent disease, caused by vitamin deficiency, was called <u>tsynga</u> (scurvy). The person affected had nits in his line and had trouble moving his least and his akin become
